

Dennis Chambers Phrases Famous Groove Pattern

This is a very cool phrase made famous by Dennis Chambers. I never could work out exactly what he was playing until I saw some clinic footage of him slowing it down. I still had trouble getting the exact sticking but I think this is it.

Here's the basic pattern (the very first note is an optional accent):

R L R L R L F

You can then add open hi-hat notes to give it more of a 'Dennis' feel:

R L R L R L F

Here is a slightly different version I came up with. You could also add open hi-hat notes like the groove above:

R L R L R F R L F L
